WOMEN'S HEALTH CHARITY**

Overview

Barts Health
NHS Trust

Two days hands-on training on Laparoscopic dissection, use of different energy sources, suturing (intracorporeal, extracorporeal, ipsilateral and contralateral).

An intensive two-day laparoscopic course designed to enrich essential knowledge and skills required to perform intermediate and advanced level safe Laparoscopic Gynaecological practice. It covers key theoretical aspects and ample hands-on experience in common Gynaecological procedures on laparoscopic models.

Who should attend?

Trainees, Consultant Gynaecologists and doctors of any grade who are keen to develop intermediate and advanced laparoscopic skills for day-to-day Gynaecological practice.

Theoretical lectures –

Very few small lectures on the basics of laparoscopy, energy sources, dissection, suturing principles, safe practice to avoid complications and to identify and manage these complications in laparoscopic surgery.

Hands-On Workstations -

Delegate seeking intermediate skills will be paired with a delegate seeking advanced skills for each laprotrainer model. Each pair will have ample opportunity for hand on practice on the laprotrainer –

Basic skills – Threading, stacking, sorting

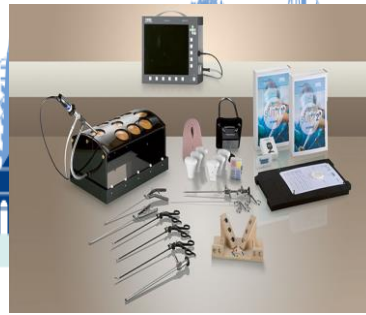

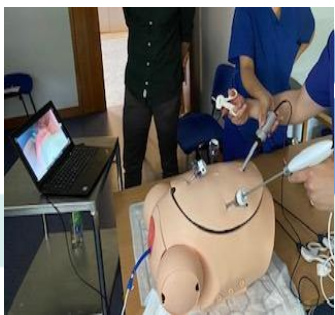

Intermediate skills – Salpingectomy and Salpingotomy; Ovarian Cystectomy & Oophorectomy

Advanced skills – Myomectomy, Total laparoscopic hysterectomy, Intra and extra-corporeal suturing.

Laprotrainer and simulators and uterine models are being provided by Karl Storz, Applied, Ethicon and Cooper surgical with plenty of hands-on opportunity to do hysterectomy, vault suturing, myomectomy, extensive practice on suturing.

V-Note simulators will be available to practice.

There will be additional display stands with advance instruments from the sponsors.

08.06.2023 - Thursday

Programme

Barts Health
NHS Trust

09.00 - Registration

09.30 - Welcome and outline of course structure and objectives

09.45 - Laparoscopic pelvic anatomy and entry techniques – Mr Zayed Khan

10.00 - Workstation* One - Basics

11.00 - Coffee Break

11.30 - Principles of electro surgery energy modalities and tissue sealing Techniques – Mr Sameer Umranikar

11:45 - Workstation* Two – Use of energy sources

13.00 - Lunch

13.30 – Laparoscopic myomectomy – Mr Gourab Misra

13.45 - Work station* Three – Salpingectomy, Ovarian cystectomy

15.00 - Coffee Break

15.30 – Laparoscopic suturing - Mr Zayed Khan

15.45 - Work station* Four - Suturing

17:00 - Close of Day one

For work-stations - Laparoscopic simulators

18.30 - Course dinner (Venue TBC)

09.06.2023 - Friday

Programme

Barts Health
NHS Trust

09.00 - Registration and refreshments

09.30 - Management of laparoscopic complications – urological injuries – Mr Teele Kuusk

09.50 - Workstation* Five – Hysterectomy, Myomectomy and Suturing on uterine models.

11.00 - Coffee Break

11.30 –Management of Laparoscopic complications –bowel injuries - Karekin Keshishian

11:50 - Workstation* Six - Hysterectomy, Myomectomy and Suturing on uterine models.

13.00 - Lunch

14.00 - Management of Laparoscopic complications – vascular injuries – Mr Pranav Somaiya

14:20 - Work station* Seven - Hysterectomy, Myomectomy and Suturing on uterine models.

15.30 - Coffee Break

16.00 – Introduction to “V-Note” – Mr Elias Kovoov

16:20 – Current trends and approaches to Pelvic Floor Surgery – Mr Joan Melendez-Munoz

17:00 - Close

For work-stations - Laparoscopic simulators, Robotic simulators and V-Note simulators
